Attention, Alvin Stedel

Hi, Alvin

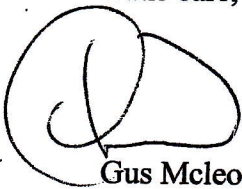

When I talked to you about treating my latest pickup with Enviro-save, you asked me how my Harley was doing as I had treated it when it had only about 3,000 km on it.

My 1997 FLSTS Heritage Springer c/w a Stage one kit, is running just great, when I get a chance to ride it. It has a little over 55,000 km on it and other than tires, I haven't had to do any repairs.

I have used Enviro-save on a few of my vehicles and certainly have no problem recommending it to anyone. Fuel is not an issue on the Harley but any assistance on the pick up is appreciated. I put on about 45,000 km per year.

I'm glad to hear that you are moving more Enviro-save, It's about time. It is a great product and certainly has withstood the test of time. I can't think of anyone who has used Enviro-save that isn't pleased with it.

Take care,
